

Making a bug hotel for your garden or school is a very easy way of making a home for a wide variety of insects.

Follow these six easy steps to make your own...

Firstly, take about 12 or so bits of bamboo (they need to be about the same length but it doesn't matter h

Make sure that you have the right amount to hold in between your hands.

Ask someone to hold the bamboo sticks for you. Wrap a length of garden twine around all of the bamb

Make a bug hotel

Finish off by tying the bundle of twigs around the middle of the wire with a pair of scissors (make sure you are not cutting the twigs).
